Batch: 2

Roll Number: 1601420061 **Experiment NO.7**

Name: Sargundeep Sachdeo

Title of the Experiment: Develop a linear regression model using Microsoft Azure Machine Learning Studio

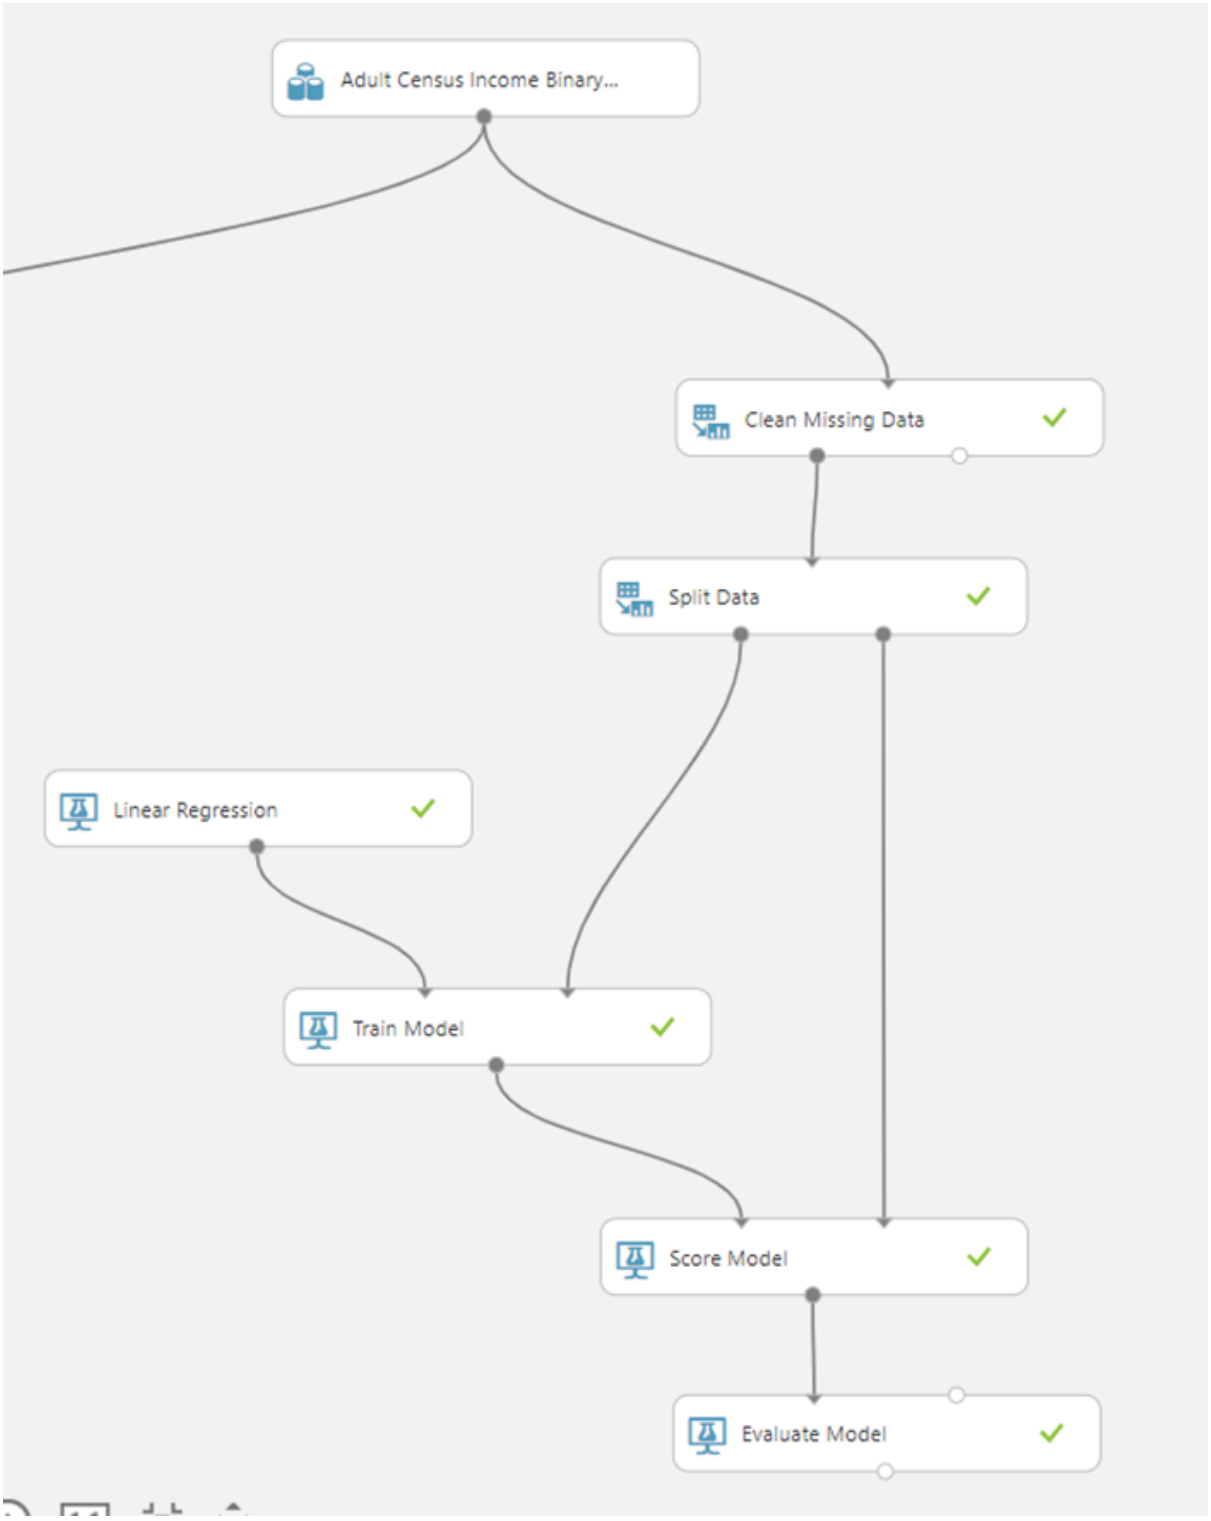
---

Program:

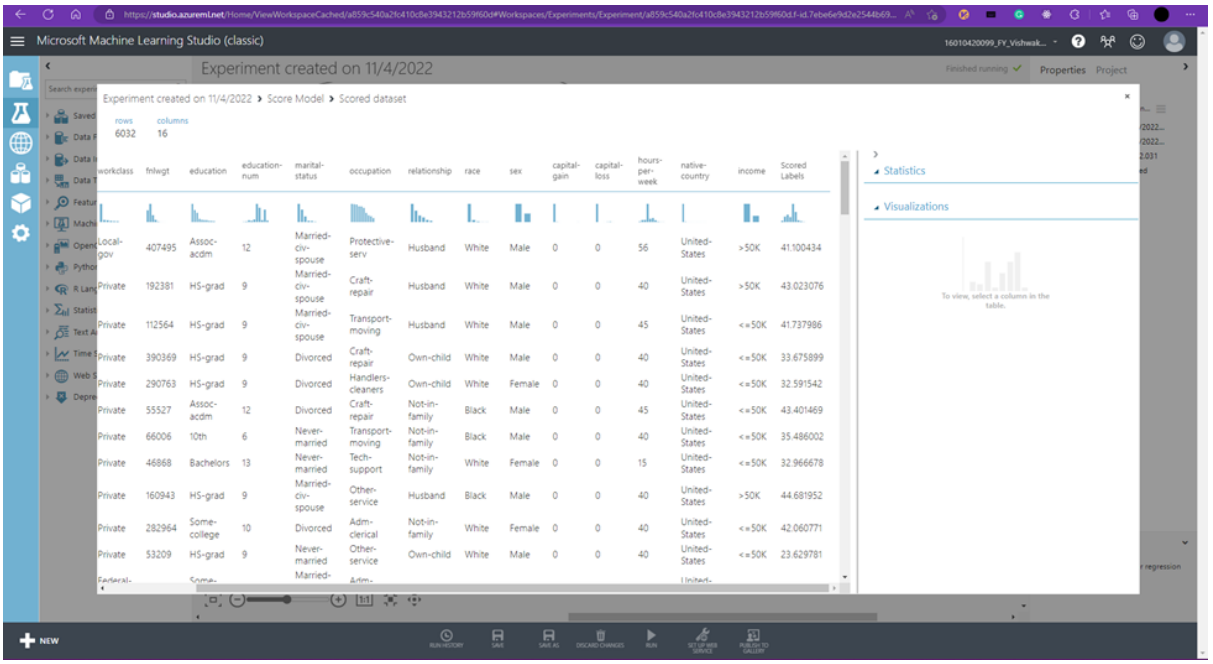
Dataset used: Adult Income Census

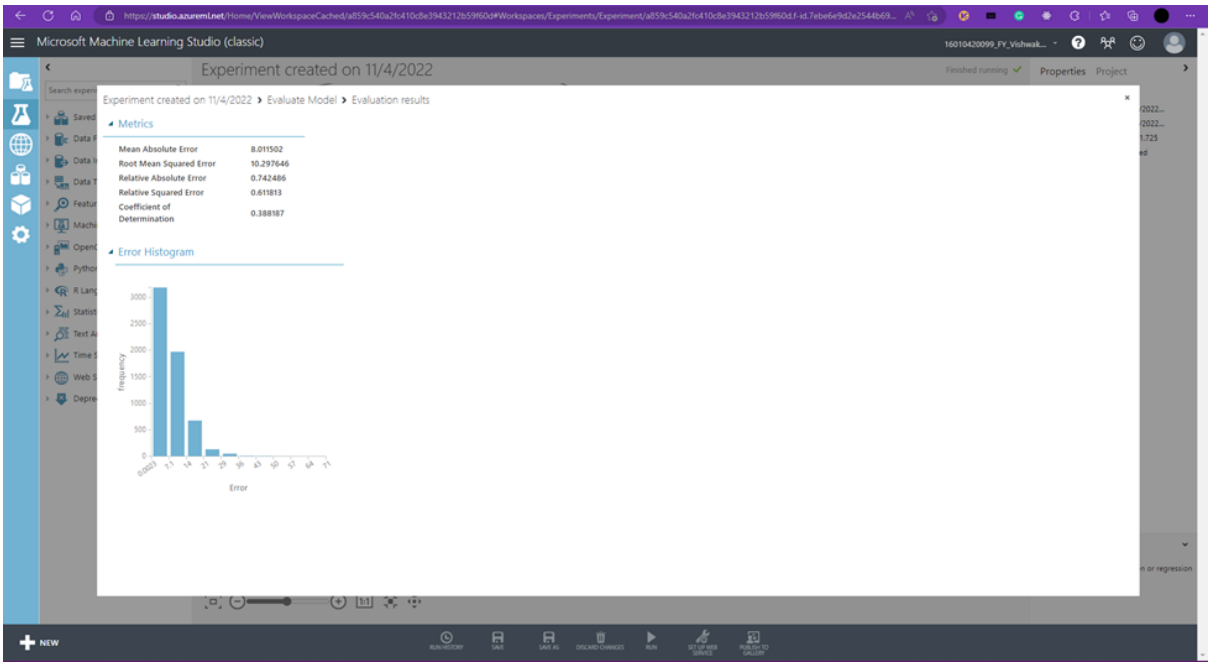
Classes: The 'age' variable is the target class here. We perform regression to predict age values.

Screenshots:



Adult Census Income Binary...
Clean Missing Data
Split Data
Linear Regression
Train Model
Score Model
Evaluate Model





CO: Apply concepts of different types of Learning and Neural Network

Conclusion: Successfully Learnt and Implemented the model in Azure ML Studio.
